

Activities held in Indonesia on the occasion of the 2005 International Day for the Preservation of the Ozone Layer

- A half-day high-level meeting to discuss the issues that will encourage national stakeholders to agree to establish a reliable system to control the ODS import was organised.
- Organised a science camp for students of secondary schools to raise awareness i.e. by organising visits for children to companies that produce CFC-free appliances and for demonstration on how retrofitting is done, how to detect false labelling on the issue of illegal trade of ODS smuggling, how to detect leaks and to show how home appliances are maintained and why it is important to safely dispose ODS containing old appliances.
- Organised a talk show on the depletion of the ozone layer and how the civil society can contribute for its protection. This was broadcasted on Ozone Day.
- Organised a meeting with the Implementing Agencies, the Diplomatic Corps representing countries from the region and other invited special guests to celebrate the Regional Ozone Day.
- Organised a rally to raise awareness on the ozone issue with the participation of university students taking broken umbrellas as a symbol of the damaged ozone layer. The participants also distributed awareness material.
