

Activities held in Tajikistan on the occasion of the 2005 International Day for the Preservation of the Ozone Layer

The interview to Mr. A. Kurbanov, Head of the National Ozone Unit, on the topic “Let us protect the ozone layer and live in safety under the sun” was published in the republican ecological newspaper “Navruzi Vatan”.

Mr. Kurbanov presented his speech on the first republican radio programme on the topic “16th September – the International Ozone Day; the role of Vienna Convention and Montreal Protocol in the life of people; contribution of the Republic Tajikistan to realization of international agreements.”

Mr. Kurbanov presented his speech on the republican radio programme “Brunmarz”, which is intended for countrymen living abroad, on the topic “Let us protect the ozone layer for the sake of life on our Earth.” This broadcast is available not only for citizens of Tajikistan, but also for people in neighboring countries, including Afghanistan, Iran, part of Pakistan and others.

Associates of the National Ozone Unit and representatives of the Committee on Environment Protection conducted the meetings with schoolchildren and students of institutes of higher education on the topic “Let us protect the ozone layer; why the hole in ozone layer is dangerous to us?”

Several booklets were issued by the National Ozone Unit and distributed among populations. There are:
“Measures undertaken by the Republic of Tajikistan for ozone layer protection” and
“Problems connected with producing ozone depleting substances and ways to resolve these problems”. The author of these booklets is Mr. H.P. Husainov, Deputy Head of the National Ozone Unit.
