

## **Activities held in Thailand on the occasion of the 2005 International Day for the Preservation of the Ozone Layer**

The International Ozone Day for this year was conducted under the theme of “Ozone City ... the City of Knowledge for Ozone Recovery” at one leading department store located in central area of Bangkok, on 16-17 September. Activities undertaken included exhibition and entertainment zones for displaying information and documentary video regarding knowledge on ozone protection, game zone, information zone by officers from the Department of Industrial Works (DIW) and stage zone such as Questions and Answers, discussion panel on impacts of uses of ODSs and ODSs products on human lifestyles by the Deputy General-Director and Thai celebrities. All these activities were aimed to disseminate information on how to select non-ODS products and service; i.e., mobile air conditioning (MAC), system maintenance service, alternative substances for replacing halon used in fire protection industry and non-CFCs metered dose inhalers (MDI), etc.
