

## **FREQUENTLY-ASKED COMPLIANCE-RELATED QUESTIONS**

### **Q9: WHICH PARTIES MUST REPORT TRANSHIPMENT OF ODS AND IMPORT FOR RE-EXPORT OF ODS?**

#### **Transshipment**

The country of origin of the controlled ozone-depleting substance (ODS) shall be regarded as the exporter, and therefore should report to the Ozone Secretariat its export of the ODS that is to be transshipped, in the official data reporting forms.

The country of final destination, not the countries through which the ODS is transshipped, shall be regarded as the importer and therefore should report to the Ozone Secretariat its import of the ODS that was transshipped.

The country or countries through which the ODS is transshipped do not report the movement of the ODS to the Ozone Secretariat.

#### **Import for re-export**

The country of origin of the controlled ODS shall be regarded as the exporter, and therefore should report its export of the ODS.

The country to which the ODS is imported for re-export (intermediate destination) is regarded as an importer and an exporter, and therefore should report both its import and its export of the ODS.

The country of final destination is also regarded as an importer, and therefore should report its import of the ODS.

(decision IX/34)
