UNEP/OzL.Pro.WG.1/30/CRP.1  
15 June 2010

Original: English

**Open-ended Working Group of the Parties to  
the Montreal Protocol on Substances that  
Deplete the Ozone Layer  
Thirtieth meeting**

Geneva, 15–18 June 2010

Agenda item 6

**Proposed amendments to the Montreal Protocol**

## **Proposed draft decision submitted by Canada, Mexico and the United States of America on the phase-out of HFC-23 as a by-product emission of HCFC-22 with high global-warming potential**

### **Note by the Secretariat**

The annex to the present note sets out a proposed draft decision submitted by Canada, Mexico and the United States of America on the phase-out of HFC-23 as a by-product emission of HCFC-22 with high global-warming potential. The proposal is being circulated as received and has not been formally edited.

## Annex

### **Phase-out of HFC-23 as a by-product emission of HCFC-22 with high global-warming potential**

*Recalling* decision X/16 which recognizes the importance of implementing the Montreal Protocol and takes note of HFCs and PFCs as replacements for ozone depleting substances that have potentially substantial impacts on the climate system;

*Noting with appreciation* the special report of the Technology and Economic Assessment Panel and the Intergovernmental Panel on Climate Change, "Safeguarding the Ozone Layer and the Global Climate System: Issues Related to Hydrofluorocarbons and Perfluorocarbons";

*Recalling* decision XVIII/12 which requested the Ozone Secretariat to facilitate consultations by the Technology and Economic Assessment Panel with relevant organizations to draw on the work already carried out under these organizations, including work relating to HCFC-22;

*Recalling* also the report of the Technology and Economic Assessment Panel pursuant to decision XVIII/12, in particular the chapter on the role of the Clean Development Mechanism with respect to HFC-23 byproduct emissions resulting from the production of HCFC-22;

*Mindful* that Parties not operating under paragraph 1 of Article 5 of the Montreal Protocol are obligated to freeze production of HCFCs by 2004 and phase out consumption by 2030 and that Parties operating under paragraph 1 of Article 5 are obligated to freeze production of HCFCs by 2016 and phase out consumption by 2040;

*Recognizing* the unique relationship of HFC-23 to the controlled substance HCFC-22, given that the production of HCFC-22 results in the by-production of emissions of HFC-23 and that the production of HCFC-22 for feedstock uses, under the Montreal Protocol, is expected to continue beyond the phase-out of production for controlled uses;

*Recognizing also* the opportunity to facilitate an environmentally responsible approach to managing the production of HCFC-22 for both controlled and feedstock uses;

*Acknowledging* that emissions of HFC-23 are covered by the Kyoto Protocol to the United Nations Framework Convention on Climate Change, and that actions taken under this decision are not intended to affect this coverage;

*Emphasizing* the potential implications of Clean Development Mechanism projects in HCFC-22 production facilities and that the value of Clean Development Mechanism credits may exceed 50 times the cost of mitigating the HFC-23 emissions;

*Recognizing* the need for immediate action to address uncontrolled HFC-23 byproduct emissions to avoid impacts on the climate system from their release, particularly in light of the near-term control measure of January 1<sup>st</sup> 2014 in the HFC amendment;

The Parties Decide:

1. To request the Executive Committee to review and update information presented in UNEP/OzL.Pro/ExCom/57/62 on HCFC-22 production facilities located in Parties operating under paragraph 1 of Article 5, including information on location, production capacity for the facility, production capacity for each individual production line, and whether the HCFC-22 production lines have ongoing projects under the Clean Development Mechanism to limit or destroy HFC-23, as well as the end dates of these projects, and present the findings to the Parties by 31<sup>st</sup> Meeting of the Open-ended Working Group.

2. To request the Executive Committee to develop estimates of the incremental costs, including capital costs and operational costs, associated with the collection and destruction of HFC-23 byproduct emissions from HCFC-22 production in facilities located in Parties operating under paragraph 1 of Article 5.

3. To request the Executive Committee to formulate guidelines for funding projects to collect and destroy byproduct emissions of HFC-23 during the production of HCFC-22, including production for feedstock, by the 64<sup>th</sup> Meeting of the Executive Committee.
  4. To further request, as a matter of urgency, the Executive Committee to facilitate the formulation and implementation of projects to eliminate byproduct emissions of HFC-23 during the production of HCFC-22 for facilities or production lines that are not collecting emissions reduction credits under the Clean Development Mechanism.
  5. To Request the Technology and Economic Assessment Panel, in consultation with the Science Assessment Panel, to conduct a study of the potential costs and environmental benefits from the implementation of HFC-23 byproduct control measures related to production of HCFC-22 by facility or production line, excluding the costs and benefits associated with existing Clean Development Mechanism projects when relevant, and to prepare a report 60 days before 31st Meeting of the Open-ended Working Group, in order to assist the Parties in further considering this issue.
