NINTH MEETING OF THE PARTIES
TO THE MONTREAL PROTOCOL ON
SUBSTANCES THAT DEplete THE
OZONE LAYER
Montreal, 15-17 September 1997
Item 4 of the provisional agenda*

REPORT OF THE SECRETARIAT ON INFORMATION PROVIDED BY
THE PARTIES IN ACCORDANCE WITH ARTICLE 7 AND 9
OF THE MONTREAL PROTOCOL

The reporting of data by the Parties to the Montreal Protocol
on Substances that Deplete the Ozone Layer

Report of the Secretariat

I. INTRODUCTION

1. The present report contains information received by the Secretariat (as at 23 June 1997) pursuant to Articles 7 and 9 of the Montreal Protocol on Substances that Deplete the Ozone Layer.
2. Article 7 of the Montreal Protocol specifies that:
 - (a) Baseline data

Each Party shall provide to the Secretariat, within three months of becoming a Party, statistical data on its production, imports and exports of each of the controlled substances in Annex A for the year 1986, Annexes B and C for the year 1989 and Annex E for 1991 or the best possible estimates of such data where actual data are not available;

* UNEP/OzL.Pro/9/1.

(b) Annual data

Each Party shall provide to the Secretariat statistical data on its annual production (as defined in paragraph 5 of Article 1) of each of the controlled substances listed in Annexes A, B, C and E and, separately, for each substance, for the year during which provisions concerning the substances in Annexes A, B, C and E respectively entered into force for that Party and for each year thereafter. Data shall be forwarded not later than nine months after the end of the year to which the data relate.

(c) Annual data on recycling

Each Party shall provide to the Secretariat separate statistical data on its annual imports and exports of each of the controlled substances listed in Group II of Annex A and Group I of Annex C that have been recycled.

3. Research, development, public awareness and exchange of information

Article 9 specifies that every two years each Party shall submit to the Secretariat a summary of its activities under that Article, i.e., on research, development, public awareness and exchange of information.

II. STATUS OF RATIFICATION OF THE MONTREAL PROTOCOL,
THE LONDON AND COPENHAGEN AMENDMENTS

4. As at 23 June 1997, 162 Parties had ratified the Montreal Protocol and 115 had ratified the London Amendment, while the Copenhagen Amendment had been ratified by 66 Parties.

III. STATUS OF REPORTING THE BASELINE DATA

5. The Secretariat has analysed the submissions of baseline data from the Parties. The following Parties have not reported baseline data as indicated below:

Baseline data for 1986 (Annex A substances)

Parties operating under Article 5:

Overdue by:

< 6 months: Burundi and St. Vincent and the Grenadines.

6 months-1 year: Madagascar.

1-2 years: Liberia, Mongolia and Yemen.

Over 2 years: Antigua and Barbuda, Chad, Comoros, Democratic Republic of Congo, Democratic People's Republic of Korea, Dominica, Federated States of Micronesia,

/...

Grenada, Honduras, Kiribati, Libyan Arab Jamahiriya,
Mali, Marshall Islands, Nepal, Nicaragua, Nigeria,
Paraguay, Samoa, Solomon Islands and Viet Nam.

Parties not operating under Article 5:

Overdue by:

6 months-1 year: Azerbaijan and Republic of Moldova

Over 2 years: Latvia, Monaco and Turkmenistan.

Baseline data for 1989 (Annex B substances)

Parties operating under Article 5:

Overdue by:

< 6 months: St. Vincent and the Grenadines

6 months-1 year: Liberia and Mongolia.

Over 2 years: Antigua and Barbuda, Bahamas, Comoros, Democratic
Republic of Congo, Democratic People's Republic of
Korea, Dominica, Gambia, Grenada, India, Mali,
Marshall Islands, Mongolia, Nepal, Paraguay, Vanuatu
and Viet Nam.

Parties not operating under Article 5:

Overdue by:

6 months-1 year: Azerbaijan.

Over 2 years: Turkmenistan and Uzbekistan.

Baseline data for 1989 (Annex C substances under London and Copenhagen
Amendments)

Parties operating under Article 5:

Overdue by:

< 6 months: St. Vincent and the Grenadines.

6 months-1 year: Liberia and Mongolia.

1-2 years: Morocco.

Over 2 years: Algeria, Antigua and Barbuda, Barbados, Benin,
Cameroon, China, Democratic Republic of Congo,
Dominica, Guinea, Indonesia, Malawi, Marshall
Islands, Mongolia, Myanmar, Nepal, Papua New Guinea,
Sri Lanka, Vanuatu and Viet Nam.

/...

Parties not operating under Article 5:

Overdue by:

6 months-1 year: Azerbaijan.

Over 2 years: Israel and Uzbekistan.

Baseline data for 1991 (Annex E substance)

Parties operating under Article 5:

< 6 months: Saint Vincent and the Grenadines.

6 months-1 year: Mongolia.

1-2 years: Argentina, Burkina Faso, Liberia, Morocco, Thailand and Tunisia.

Over 2 years: Antigua and Barbuda, Bahamas, Barbados, Ecuador, Republic of Korea, Malaysia, Marshall Islands, Mexico and Pakistan.

Parties not operating under Article 5:

Overdue by:

6 months-1 year: Azerbaijan and Liechtenstein.

Over 2 years: European Community, Israel and Russian Federation.

6. The following Parties which, for more than two years, have been temporarily classified as operating under Article 5 of the Protocol but whose country programmes have not yet been approved, have not reported data to the Secretariat: Antigua and Barbuda, Chad, Comoros, Grenada, Kiribati, Mali, Marshall Islands, Nepal, Nicaragua, Paraguay, Samoa, Solomon Islands, Tuvalu and Vanuatu. These Parties are currently being assisted by the Executive Committee of the Multilateral Fund in country programme preparation, which, upon completion, should enable them to report the required data. No Party is currently under threat of losing the status of operating under Article 5 of the Montreal Protocol in the light of paragraph (a) (ii) of decision VI/5 of the Sixth Meeting of the Parties, which provides that:

"A country may only be classified temporarily as operating under Article 5 for a period of two years applicable from the time of adoption of the present decision. After this period, Article 5 status can no longer be extended without data reporting as required by the Protocol, unless the country has sought the assistance of the Executive Committee and the Implementation Committee. In this case, the extension period shall not exceed two years."

The Parties may consider the situation of the Parties concerned in the light of the above decision.

/...

7. Honduras, which is temporarily classified as operating under Article 5 of the Protocol, had its country programme approved by the Executive Committee of the Multilateral Fund in October 1996. Unless it reports the base year data as required by the Protocol by October 1997, it will lose that status, as provided under paragraph (a) (ii) of decision VI/5 of the Sixth Meeting of the Parties.

IV. REPORTING OF DATA FOR 1995

8. All Parties are required by Article 7 to report to the Secretariat the data for each year. In accordance with Article 7, paragraph 4, States members of the European Community are required to report to the Secretariat only the data on production of controlled substances. The Community-wide consumption data are reported by the European Community.

9. An analysis of the data reported by the Parties under Article 7 of the Protocol for the year 1995 is attached as annex I to the present report. Of the 151 Parties required to report, 107 Parties (73 Article 5 and 34 non-Article 5) have reported data. The symbol "N.R." has been used throughout the annex to indicate non-reporting by a Party.

10. The following Parties not operating under Article 5 did not report data for 1995: Austria, Brunei Darussalam, Italy, Latvia, Slovakia and Turkmenistan. The Parties operating under Article 5 that did not report data for 1995 are: Antigua and Barbuda, Argentina, Bahamas, Bangladesh, Bosnia and Herzegovina, Chad, Colombia, Comoros, Cuba, Cyprus, Democratic Republic of the Congo, Dominica, Federated States of Micronesia, Gabon, Gambia, Grenada, Honduras, Kiribati, Democratic People's Republic of Korea, Lebanon, Libyan Arab Jamahiriya, Mali, Marshall Islands, Namibia, Nepal, Nicaragua, Panama, Paraguay, Saint Kitts and Nevis, Samoa, Saudi Arabia, Solomon Islands, Syrian Arab Republic, Trinidad and Tobago, Tuvalu, Uganda, Vanuatu and Yugoslavia.

V. REMARKS ON THE DATA SUBMITTED

11. In the present report, both production and consumption figures are weighted with the ozone-depleting potential of the substances. The figures analysed in the present section are for the calendar year January-December 1995.

12. Parties not operating under Article 5 that have reported data for 1995 show an average reduction in production of chlorofluorocarbons (CFCs) of 86 per cent, halons of 99 per cent, other fully halogenated CFCs of 98 per cent, carbon tetrachloride of 91 per cent, methyl chloroform of 84 per cent and methyl bromide of 10 per cent. Production of hydrochlorofluorocarbons (HCFCs) shows an increase of 88 per cent. In the same period, these Parties reduced consumption of CFCs by 90 per cent, halons by 99 per cent, other fully halogenated CFCs by 98 per cent, carbon tetrachloride by 105 per cent, methyl chloroform by 79 per cent, methyl bromide by 9 per cent and HCFCs by 48 per cent (compared to the 1989 consumption base level, which is 1989 HCFC consumption plus 2.8 per cent of 1989 CFC consumption).

/...

13. Seven Parties operating under Article 5 (Brazil, China, India, Republic of Korea, Mexico, Romania and Venezuela) reported data on production for 1995. The production of CFCs went up by 177 per cent, of halons by 264 per cent, of carbon tetrachloride by 15 per cent, of HCFCs by 245 per cent and of methyl bromide by 159 per cent. There was no reported production of other fully halogenated CFCs either for 1995 or 1989 (the base year). The production of methyl chloroform was reduced by 87 per cent. In the same period, Parties operating under Article 5 increased consumption of CFCs by 41 per cent, of halons by 8 per cent, of other fully halogenated CFCs by 5,163 per cent, of carbon tetrachloride by 61 per cent, of HCFCs by 8 per cent (compared to the 1989 base level consumption, which is 1989 HCFC consumption plus 2.8 per cent of 1989 CFC consumption) and of methyl bromide by 174 per cent. Consumption of methyl chloroform was reduced by 38 per cent.

14. Overall, the Parties (Article 5 and non-Article 5) that reported the 1995 data decreased production of CFCs by 76 per cent, of halons by 79 per cent, of other fully halogenated CFCs by 98 per cent, of carbon tetrachloride by 75 per cent, of methyl chloroform by 84 per cent and of methyl bromide by 10 per cent. It is only the production of HCFCs that was increased, by 95 per cent.

15. The figures also show the overall consumption of CFCs to have decreased by 76 per cent, of halons by 83 per cent, of other fully halogenated CFCs by 87 per cent, of carbon tetrachloride by 74 per cent, of methyl chloroform by 76 per cent and of HCFCs by 43 per cent (compared to the 1989 level consumption, which is 1989 HCFC consumption plus 2.8 per cent of 1989 CFC consumption). Consumption of methyl bromide was increased by 9 per cent.

16. Figure 1 shows the changes in production of CFCs and halons between 1986, 1994 and 1995 for only those Parties that have reported data for the three years. In 1995, Parties operating under Article 5 increased the production of CFCs and halons by 13,376 tonnes, from 134,669 tonnes in 1994 to 148,045 tonnes. In the same period, Parties not operating under Article 5 decreased the production of CFCs and halons by 85,336 tonnes, from 220,427 tonnes to 135,091 tonnes. Figure 2 shows the changes in the consumption of CFCs and halons between 1986, 1994 and 1995. In 1995, Parties operating under Article 5 increased the consumption of CFCs and halons by 3,210 tonnes, from 182,586 tonnes in 1994 to 185,796 tonnes. In the same period, Parties not operating under Article 5 decreased the consumption of CFCs by 86,386 tonnes, from 182,680 tonnes to 96,294 tonnes. Figures 3 and 4 show the production and consumption patterns of CFCs by regions in 1986, 1994, 1995.

17. The following table shows all the cases of non-compliance with the consumption reduction schedules as revealed by the data submitted.

Table 1

Non-compliance with consumption reduction by Parties in 1995

Party <u>a/</u>	Substance in non-compliance	Reduction required	Reduction achieved
Belarus	halons	-100%	-88%
	methyl chloroform	-50%	-42%
Bulgaria	halons	-100%	-60%
Czech Republic	methyl bromide	freeze at 1991 level	+71%
Japan	methyl bromide	freeze at 1991 level	+143%
Poland	CFCs	-75%	-65%
Russian Federation	halons	-100%	-96%
Switzerland	carbon tetrachloride	-85%	-7%
Ukraine <u>b/</u>	Other fully halogenated CFCs	-75%	+56%
	methyl chloroform	-50%	+28%
Uzbekistan	CFCs	-75%	0%
	halons	-100%	-81%

a/ These Parties have been requested to provide their remarks regarding this non-compliance.

b/ Ukraine attributed this non-compliance with the control measures to the inaccuracy in determining the base year consumption data.

18. The following table shows all the cases of non-compliance with the production reduction schedules as revealed by the data submitted.

Table 2

Non-compliance with production reduction by Parties in 1995

Party <u>a/</u>	Substance in non-compliance	Reduction required	Reduction achieved
Japan	methyl bromide	freeze at 1991 level	+149%
Russian Federation	CFCs	-75%	-63%
	halons	-100%	-96%
	methyl chloroform	-50%	-35%
South Africa	carbon tetrachloride	-85%	-61%
Ukraine	carbon tetrachloride	-85%	-5%

a/ These Parties have been requested to provide their remarks regarding this non-compliance.

/...

19. A comparison of the production, import and export of substances by the Parties that have reported data for both the base years and 1995 is attached to the present report as annex II. The exports of Parties operating under Article 5 increased from 18,990 tonnes to 61,707 tonnes, while the exports of Parties not operating under Article 5 decreased from 585,068 tonnes to 154,028 tonnes between 1995 and the base years. The imports of Parties operating under Article 5 decreased from 182,610 tonnes to 151,409 tonnes, while the imports of Parties not operating under Article 5 decreased from 338,291 tonnes to 43,703 tonnes between the base years and 1995.

20. Annex III to the present report shows the quantities of import and export of new, used and recycled substances for 1995.

21. Annex IV to the present report provides an analysis of data on production and consumption of ozone-depleting substances (ODS) by five regions (Africa, Asia, Eastern Europe, Latin America and the Caribbean and Western Europe and Others) for groups of substances for 1995 as compared to the base years.

VI. DATA FOR THE YEAR 1994

22. The 1994 data were analysed and placed before the Eighth Meeting of the Parties in 1996. Since then, data have been received from the following Parties operating under Article 5: Bahrain, Chile, Costa Rica, Ecuador, El Salvador, Myanmar, Saint Kitts and Nevis and Zimbabwe. Parties not operating under Article 5 that have reported data are: Belgium, Greece, Luxembourg and Russian Federation. In total, 115 (76 Parties operating under Article 5 and 39 Parties not operating under Article 5) have reported, out of the 141 Parties required to report. Annex V to the present report contains an analysis of the updated 1994 data.

23. Parties not operating under Article 5 that reported data for 1994 showed an average reduction in production of CFCs of 78 per cent, from 1,027,026 tonnes in 1986 to 228,823.3 tonnes in 1994; halons of 99 per cent, from 186,168.0 tonnes in 1986 to 1,446 tonnes in 1994; other fully halogenated CFCs of 92 per cent, from 3,317 tonnes in 1989 to 275.5 tonnes in 1994; carbon tetrachloride of 89 per cent, from 337,617.5 tonnes in 1989 to 37,141.9 tonnes in 1994; methyl chloroform of 79 per cent, from 69,470.5 tonnes in 1989 to 14,814.5 tonnes in 1994; and methyl bromide of 25 per cent, from 22,448.5 tonnes in 1991 to 16,801.2 tonnes in 1994. The same Parties increased production of HCFCs by 54 per cent, from 13,264.4 tonnes in 1989 to 20,418.3 tonnes in 1994. Consumption of CFCs was reduced by 81 per cent, from 957,261.2 tonnes in 1986 to 183,813.3 tonnes in 1994; halons by 99 per cent, from 179,955.2 tonnes in 1986 to 1,464 tonnes in 1994; other fully halogenated CFCs by 92 per cent, from 3,298 tonnes in 1989 to 261.9 tonnes in 1994; carbon tetrachloride by 98 per cent, from 275,811.1 tonnes in 1989 to 6,258.8 tonnes in 1994; methyl chloroform by 83 per cent, from 60,307.8 tonnes in 1989 to 10,381.3 tonnes in 1994; HCFCs by 59 per cent (compared to the 1989 consumption base level, which is 1989 HCFC consumption plus 2.8 per cent of 1989 CFC consumption), from 36,666.8 tonnes in 1989 to 14,946.6 tonnes in 1994; and methyl bromide by 29 per cent, from 20,665.7 tonnes in 1991 to 14,628.3 tonnes in 1994.

/...

24. Parties operating under Article 5 that reported data for 1994 showed an average increase in the production of CFCs of 150 per cent, from 44,337.7 tonnes in 1986 to 110,909 tonnes in 1994; and halons of 123 per cent, from 11,200 tonnes in 1986 to 25,020 tonnes in 1994. There was no reported production of other fully halogenated CFCs, as had been the case in 1989. Production of HCFCs increased by 281 per cent, from 601.2 tonnes in 1989 to 2,293.5 tonnes in 1994, while production of carbon tetrachloride was reduced by 66 per cent, from 64,040.5 tonnes in 1989 to 22,038.5 tonnes in 1994; methyl chloroform by 102 per cent, from 1,157.2 tonnes in 1989 to -27.8 tonnes in 1994; and methyl bromide by 83 per cent, from 74.4 tonnes in 1991 to 12.6 tonnes in 1994. The same Parties increased consumption of CFCs by 41 per cent, from 116,688.5 tonnes in 1986 to 164,188.3 tonnes in 1994; other fully halogenated CFCs by 1988 per cent, from 72.1 tonnes in 1989 to 1,504.8 tonnes in 1994; HCFCs by 7 per cent (compared to the 1989 consumption base level, which is 1989 HCFC consumption plus 2.8 per cent of 1989 CFC consumption), from 3,993.1 tonnes in 1989 to 4,285.2 tonnes in 1994; and methyl bromide by 165 per cent, from 2,525.8 tonnes in 1991 to 6,688 tonnes in 1994. Consumption of halons was reduced by 2 per cent, from 31,131 tonnes in 1986 to 30,355.4 tonnes in 1994; carbon tetrachloride by 5 per cent, from 69,867 tonnes in 1989 to 66,529.3 tonnes in 1994; and methyl chloroform by 27 per cent, from 4,684.9 tonnes in 1989 to 3,439.8 tonnes in 1994.

25. Overall, the Parties (Article 5 and non-Article 5) that reported data for 1994 showed a reduction in the production of CFCs of 68 per cent, halons of 87 per cent, other fully halogenated CFCs of 92 per cent, carbon tetrachloride of 85 per cent, methyl chloroform of 79 per cent and methyl bromide of 25 per cent. Production of HCFCs increased by 64 per cent.

26. Consumption of ODS by all Parties (Article 5 and non-Article 5) that reported data for 1994 showed an overall decrease in CFCs of 68 per cent, halons of 85 per cent, other fully halogenated CFCs of 48 per cent, carbon tetrachloride of 79 per cent, methyl chloroform of 79 per cent, HCFCs of 53 per cent (compared to the 1989 consumption base level, which is 1989 HCFC consumption plus 2.8 per cent of CFC consumption in 1989), and methyl bromide of 8 per cent.

VII. DATA FOR THE YEAR 1996

27. Only 27 Parties (Algeria, Bahrain, Belgium, Cameroon, Costa Rica, Cote d'Ivoire, Croatia, Dominican Republic, Ethiopia, Ghana, Hungary, Jamaica, Jordan, Lesotho, Malaysia, Papua New Guinea, Peru, Philippines, Qatar, Russian Federation, Saint Kitts and Nevis, Senegal, Singapore, the Former Yugoslav Republic of Macedonia, Uruguay, Venezuela and Zimbabwe) have so far reported data for the year 1996. Their information appears in Annex VI to this report. Although Parties have until the end of September 1997 to report data for 1996, they are encouraged to transmit them to the Secretariat as soon as they are available. The Secretariat has already sent a reminder to that effect to all Parties from whom data are due. The data for 1996 will be analysed and submitted to the Meeting of the Parties in 1998.

/...

VIII. HCFC CONSUMPTION FOR 1989

28. Annex VII to the present report provides the 1989 base year consumption for each Party without adding 2.8 per cent of the 1989 calculated consumption of CFCs as required under paragraph 1 (a) of Article 2F of the Protocol. The formula given in that paragraph has been used in the calculation of HCFC baseline consumption data reported for 1994 and 1995 annexed to this report.

IX. DATA ON RECYCLING

29. The following Parties reported data on annual imports and exports of recycled ODS for 1995.

<u>Party</u>	<u>Substances</u>	<u>Import/Export</u>	<u>Quantity</u>
Canada	CFC-12	Import	0.7 tonnes
	CFC-115	Import	0.2 tonnes
	Halon-1211	Import	15.0 tonnes
		Export	36.0 tonnes
	Halon-1301	Import	5.0 tonnes
Export		280.0 tonnes	
	Halon-2402	Export	6.0 tonnes
China	Halon-1301	Import	130.0 tonnes
Ghana	CFC-12	Import	0.6 tonnes
Hungary	CFC-12	Import	100.0 tonnes
Iceland	Halon-1301	Import	7.0 tonnes
	HCFC-22	Import	0.4 tonnes
Israel	CFC-12	Import	35.0 tonnes
	Halon-1211	Import	330.0 tonnes
	Halon-1301	Import	680.0 tonnes
Poland	CFC-12	Import	6.0 tonnes
	CFC-114	Import	2.0 tonnes
Russian Federation	CFC-12	Export	400.0 tonnes
	CFC-113	Export	80.0 tonnes
	Halon-1211	Export	0.9 tonne
	Halon-1301	Export	82.0 tonnes

/...

X. RECLAMATION FACILITIES

30. By paragraph 4 of decision VI/19 of the Sixth Meeting of the Parties, all Parties with reclamation facilities are requested to submit to the Secretariat, on an annual basis, a list of the reclamation facilities and their capacities. Information received from 17 Parties with reclamation facilities was attached as Annex VI to the report of the Secretariat on data, document UNEP/OzL.Pro.8/3, and placed before the Eighth Meeting of the Parties. Subsequent information provided by Australia, France, Germany and Switzerland and not included in that report is annexed to this report as Annex VIII.

XI. RESEARCH, DEVELOPMENT, PUBLIC AWARENESS AND EXCHANGE OF INFORMATION

31. The Secretariat has received the following information on research, development, public awareness and exchange of information since the publication of the last report (UNEP/OzL.Pro.8/3).

A. Australia

1. Research and development

32. Technologies for the containment, recovery, recycling or destruction of ODS:

(a) Refrigerant reclamation fund: During 1994/1995, only one facility was available in Australia for the reprocessing of controlled substances. The facility reprocessed an average of 4 tonnes per month of CFC-11, CFC-12 and HCFC-22. The facility closed down towards the end of 1995 but has since reopened under new management. Material for reprocessing was collected by the ODS Reclaim Scheme. This Scheme is an industry-funded voluntary system, whereby the industry finances, via a levy on new CFC and HCFC refrigerants, a series of financial incentives for the return of recovered ODS. The ODS Reclaim Scheme finances the payment of a small bounty to contractors to return recovered ODS and a payment to wholesalers to test and handle the ODS. State law requires wholesalers to accept ODS returned by contractors.

(b) National halon bank: All non-essential halon systems and halon fire extinguishers were decommissioned by 31 December 1995. The halon recovered from this equipment has been stored in a national halon storage and recycling facility. Since its construction in 1993, more than 1,000 metric tonnes of halon have been securely stored at this facility pending the construction of a halon destruction facility. This halon is available for approved essential uses.

(c) Possible alternatives: During 1995, Australia, Canada and the United States of America funded the preparation of four case studies of agricultural production without methyl bromide. The case studies covered a range of different produce in Colombia, Netherlands and Italy and showed that alternatives to methyl bromide uses do exist and can be cost-effective. The

/...

report was produced in Australia and disseminated in cooperation with the OzonAction Programme of the UNEP Industry and Environment Programme Activity Centre (UNEP/IE).

2. Public awareness

33. The Federal Environment Protection Agency (EPA) released over 600,000 brochures during 1995 as part of a public awareness campaign on the upcoming phaseout of CFCs and the impact this would have on vehicle air conditioners and commercial building air conditioners.

34. On 16 September 1995, as part of International Day for the Preservation of the Ozone Layer, a public awareness campaign was undertaken, targeting the withdrawal of halon fire extinguishers at the end of 1995. This campaign involved media releases in journals and newspapers and newspaper and radio advertising.

35. The EPA home page on the Internet has three sections on ozone protection plus links to the full text of the Montreal Protocol and copies of ozone protection legislation.

3. Information Exchange

36. Australia is a member of the ODSNET/SEAP Network and attended meetings in 1994 and 1995 to exchange information on experiences with various policy, legislative and practical approaches to ODS phaseout. At the 1994 meeting, Australia developed a bilateral project to assist Indonesia with the development of policy frameworks to control the consumption of ODS. The advice provided built on Australia's experience with regulatory controls and monitoring options.

B. Denmark

37. The Danish Government has supported a number of projects to disseminate information about alternative substances and technologies. The reports of these projects are written not only in Danish, but the most important ones are also available in English and are distributed widely. Among these are:

- (a) Polyurethane foam without ozone depleting substances, 1995;
- (b) Going towards natural refrigerants, 1995;
- (c) Going towards natural fire extinguishants, 1995.

Every year a report - in Danish with English summary - on the development of the Danish phaseout of ODS is completed and distributed. This report gives public awareness of the ozone layer problem.

C. European Community

38. The European Commission, within the Environment programme (1991-1994) and the Environment and Climate programme (1994-1998), supports scientific research activities designed to understand the causes and the consequences of stratospheric ozone depletion. The results are disseminated in reports.

39. In addition, the European Commission has financed the Task Force on Countries with Economies in Transition (CEIT) Aspects of the Technology and Economic Assessment Panel (TEAP) under the Montreal Protocol.

40. Results of the collection of statistical data on production, imports, sales and exports of ODS are compiled in an annual factsheet, which is publicly distributed. In 1995, the European Commission commissioned two studies on alternatives to HCFCs and methyl bromide. The final reports were issued in November 1996.

41. Member States have also supported a large number of projects to protect the ozone layer from ODS.

D. India

42. The following activities were undertaken during the period under review:

(a) Project on environmentally sound hydrocarbon technology in the domestic refrigeration subsector, implemented with assistance from the Swiss and German Governments;

(b) Ozone layer protection included as one of the four items in the 1994 National Environment Awareness Campaign, implemented through non-governmental organizations;

(c) Bimonthly newsletter entitled: Vatis Update on Ozone Layer Protection published and distributed;

(d) Interaction meeting between the Halon Technical Options Committee (HTOC) and industry organized in February 1994;

(e) Two workshops on awareness generation, training of consultants and project preparation held in 1994; two workshops each for halon and refrigeration and the air conditioning sectors, one workshop for the solvent sector and four information dissemination workshops exclusively for the small industries sector organized in 1995;

(f) Experts and representatives of the Government and industry participated in a regional aerosol workshop in Jakarta in May 1995;

(g) Newspaper advertisement campaign launched in January-March 1995 throughout the country to create awareness among industrialists and to encourage them to come up with ODS phaseout projects;

(h) UNEP and Executive Committee documents regularly distributed to selected persons and institutions covering Government, industry, non-governmental organizations, etc. a number of meetings held with industry and others on current issues;

(i) First International Day for the Preservation of the Ozone Layer was celebrated in a befitting manner: a painting competition on protection of the ozone layer was organized in the schools of Delhi on this occasion. The Minister for Environment and Forests gave away prizes to winners of this competition during the function organized to celebrate the day. A panel discussion on ozone layer protection was broadcast over national television. Many state governments also organized programmes on this occasion.

E. Jordan

43. During the period under review, Jordan organized or participated in the following measures:

- (a) Regional training course on aerosol conversion, Amman, 22-24 March 1994;
- (b) Regional foam workshop, Egypt, 2-4 November 1993;
- (c) Regional halons workshop, Egypt, 6-8 November 1993;
- (d) Study tour to Egypt for the aerosol sector, 12-18 June 1993;
- (e) First Awareness Day on Ozone (Northern Region), Amman, 26 December 1994;
- (f) Second Awareness Day on Ozone (Middle Region), Amman, 30 April, 1995;
- (g) Third Awareness Day on Ozone (Southern Region), November 1995;
- (h) Many lectures in schools, institutes, universities, etc., to enhance public awareness among students.

F. Malaysia

44. In 1994, Malaysia undertook the following awareness activities:

- (a) Regional workshops on halon bank management (jointly organized with UNEP);
- (b) Launch of the Maximum Allowable Concentration (MAC) Recycling Project Agreement;
- (c) ODS project preparation workshop (jointly organized with the World Bank);
- (d) National ODS seminar, attended by 100 participants;
- (e) Launch of the first Malaysia Ozone Layer Protection Award sponsored by the company DuPont; commemorative plaques awarded to 14 recipients by the Deputy Minister of Science, Technology and the Environment.

45. In 1994, the following publications on ODS were issued:

- (a) Significant New Alternative List;
- (b) Guidelines for Project Preparation Under the Multilateral Fund;
- (c) The Sooner the Better for the Protection of the Ozone Layer (published jointly with ICI);
- (d) The Montreal Protocol and ODS Alternatives Developments (published jointly with DuPont);
- (e) ODS Solvents;

(f) Guidelines on Control Measures for the Protection of the Ozone Layer.

46. In 1994, Malaysia undertook the following control measures:

(a) Introduced an application permit system to control the import of Annex A and B substances;

(b) Issued guidelines on control measures for the protection of the ozone layer;

(c) Introduced Custom Duty (Amendment No.35) Order 1989 (under Schedule II of the Customs Act) (to monitor the import and use of ODS in Annexes A, B, C and E of the Protocol.

47. In 1995, the following measures were undertaken:

(a) Four series of workshops in hands-on-training in MAC recycling. A total of 285 MAC-competent technicians from selected workshops, Government training centres and car air-conditioning plants were trained to handle the MAC recycling machines;

(b) Two series of national aerosol seminars, jointly organized with the United Nations Development Programme (UNDP). The seminars were attended by more than 50 small and medium-sized aerosol enterprises. 35 small and medium-sized enterprise umbrella projects were submitted to the Executive Committee of the Multilateral Fund at the nineteenth meeting;

(c) National ODS seminar, attended by 70 participants;

(d) Talk on hydrocarbon technology, organized by Greenpeace representatives;

(e) International Day for the Preservation of the Ozone Layer celebrations. Activities included the distribution of ODS publications, pamphlets and posters to the public, schools, industries and universities. One-week ozone quiz jointly organized by Radio 1 (RTM), MELCOM and DOE;

(f) Talk on methyl bromide technology, organized by experts from the UNEP Methyl Bromide Technical Options Committee and attended by 15 key users of methyl bromide;

(g) Second Malaysia Ozone Layer Protection Award, sponsored by DuPont and given to selected organisations, industries and individuals in recognition of their efforts to protect the ozone layer. Commemorative plaques awarded to 13 recipients by the Minister of Science, Technology and the Environment;

(h) Seminar on refrigeration and air-conditioning, attended by 85 participants, on recent developments relating to the Vienna Adjustments to the Montreal Protocol.

/...

48. In 1995, the following publications on ODS were issued:

- (a) Protect the Ozone Layer (published jointly with Atochem);
- (b) Malaysia Country Programme Update;
- (c) ODS Directory Update;
- (d) Brochure entitled "MAC vs. the Ozone Layer";
- (e) Guidelines for Prequalifying and Selection Criteria for Acceptable Alternatives to ODS in Malaysia;
- (f) Montreal Protocol Multilateral Fund Project: Scheme to Reduce the Use of CFCs from MAC;
- (g) Posters to commemorate International Day for the Preservation of the Ozone Layer and on "Penipisan Ozon", published jointly with the World-Wide Fund for Nature (WWF);
- (h) Malaysia Ozone Layer Protection Award;
- (i) ODS calendar 1996;
- (j) Guide Book for Mechanics (in three languages) on the reduction and recovery of CFCs in MAC;
- (k) Also issued promotional ties, pins and clips.

49. In 1995, Malaysia undertook the following control measure: issued final drafts of the EQ (Refrigeration Management) Order and the EQ (Halon Management) Order.

G. Saint Lucia

50. The Government of Saint Lucia, with assistance from the OzonAction Programme, prepared a country programme in 1993-1994 which defines the actions to be undertaken to phase out the use of ODS in Saint Lucia. In 1995, the Government undertook measures in observation of the International Day for the Preservation of the Ozone Layer, using local resources in excess of \$4,000. These measures had two main objectives, namely:

- (a) To sensitize the public to the causes of ozone depletion and the individual and collective actions which will mitigate this problem, and
- (b) To make the public aware of national and international efforts to protect the ozone layer.

51. Further activities in compliance with this requirement depend, to a large measure, on the institutional strengthening support defined in the country programme.

H. Singapore

52. In the area of research and development, Singapore developed an ODS-free cleaning system for copper tubing used in refrigerator compressor.

53. Public awareness promotional activities undertaken in Singapore included:

(a) Regional seminar on methyl chloroform (1,1,1-trichloroethane) elimination, 22-23 March 1995;

(b) Regional training workshop on CFC-113 and methyl chloroform substitutes and alternative technology, 13-15 December 1995.

I. Slovakia

54. The Ministry of the Environment prepared a series of radio and television discussions and television films on environmental problems for the general public. Two of those were also devoted to the importance and means of ozone layer protection, reduction of emissions and climate change.

55. To celebrate International Day for the Preservation of the Ozone Layer, a technological seminar on the ODS technologies and phaseout replacements was organized for ODS consumers. The consumers were given the opportunity to talk to experts and to receive information on phaseout activities in Slovakia.

56. The Slovak Union for Cooling and Air-Conditioning Technology, in cooperation with experts from neighbouring countries (Hungary, Czech Republic, Germany, Austria, France, Great Britain), regularly organizes professional seminars on:

(a) Possible alternatives to controlled substances;

(b) Recovery, recycling and reclamation of used ODS;

(c) Devices for the recovery and disposal of CFC and HCFC refrigerants during the repair of refrigeration equipment and handling of refrigerants;

(d) Technological trends in production of refrigerators, freezers and air-conditioning devices.

J. Sudan

57. The Ozone Office is making efforts to raise public awareness of the ozone issue and to ensure that industry has the skills needed for the effective implementation of the phaseout programme. Several activities have been carried out, such as meetings, seminars, group briefings, articles in newspapers, radio and TV programmes. The Ozone Office has also translated the country programme and other UNEP key documents into Arabic and distributed them to governmental and other related organizations.

/...

58. The Sudanese Chamber of Industry Association, the Vocational Training Department of the Ministry of Labour and the University of Science and Technology have been consulted with regard to the rational and practical implementation of training programmes in refrigeration and air-conditioning.

K. Sweden

59. The Swedish International Development Cooperation Agency contributes by sponsoring a network for government officers in charge of strategies to phase out ODS in Southeast Asia (ODSONET/SEAP). The Swedish Environmental Protection Agency participates in the network.

60. The Swedish Environmental Protection Agency has given bilateral assistance to the Baltic countries by conducting the first part of a pre-study on institutional strengthening and a training programme for refrigeration technicians.

61. An evaluation of Swedish ODS phaseout, describing the phaseout from its historical, economic and technical aspects, has been translated into English and distributed.

L. Switzerland

62. An international conference on the theme "Fire Safety - without Halon" was held in Zurich from 7 to 9 September 1994 by the Swiss Fire Protection Service in collaboration with NFPA and CFPA Europe. More than 200 participants attended.

63. Since 1992, Switzerland has been working with Germany and India on a project for the transfer of ozone-friendly (and general environmentally healthy) technology. This project involves refrigeration technologies using hydrocarbons as refrigerants and in the insulating foam. It consists of supplying the technology, supporting the development and adaptation for local conditions, and supporting the dissemination of information and experience accumulated in the relevant professional circles. For this purpose, an international conference with more than 200 participants from Indian industry, Government and institutions was held in Delhi on 13 and 14 February 1996. This project is, among other things, the source of a study carried out under the auspices of the World Bank to assess the technical and economic status of this technology on the world market as well as the barriers to its spread. A three-day seminar with more than 80 representatives of the main industrial and institutional players involved in the Montreal Protocol process was held in Switzerland from 5 to 7 June 1996. The overall budget for the project is additional to the national contributions to the Multilateral Fund.

64. Through SWISSCONTACT, a non-governmental organization, Switzerland makes a contribution, additional to its contributions to the Multilateral Fund, to projects for the training of refrigeration technicians and to demonstration projects on the conservation, recovery and recycling of CFC-based refrigerants, as well as for retrofitting domestic and commercial refrigerators in Indonesia and Costa Rica.

65. In 1994, Switzerland took part in the first meeting of the network of ozone officers in South America, established by UNEP, and has also participated in the equivalent network for French-speaking African countries since its inception. It has provided information both from the point of view of Swiss regulations and their implementation and on the most appropriate substitution technologies from the point of view of health and the environment.

66. Since 1990, the Swiss Government has been financing the participation of two experts in the Solvents and Halons Technical Options Committees and, from 1996, it has been financing one of these as Co-Chair of the Halons Technical Options Committee and as a member of the Technology and Economic Assessment Panel. It has also been financing the participation of one expert in the Refrigeration Technical Options Committee since 1996.

XII. STATUS OF DEVELOPING COUNTRIES AS PARTIES OPERATING UNDER ARTICLE 5

67. As at 23 June 1997, 96 of the 157 Parties to the Protocol were classified as developing countries operating under Article 5 of the Protocol because they consumed less than 0.3 kilograms per capita of the controlled substances in Annex A and 0.2 kilograms per capita of the controlled substances in Annex B. Twenty-two developing countries which had provided incomplete or no data were temporarily classified as operating under Article 5. Their status will, however, be re-evaluated after receipt of complete data. Kuwait, which had previously been classified as not operating under Article 5, has been classified as operating under that Article after reporting data to the Secretariat which indicate their per capita consumption to have fallen below 0.3 kilograms.

68. Brunei Darussalam is the only developing country categorized as not operating under Article 5. Its status could change, once the per capita consumption falls below the ceiling prescribed in Article 5.

XIII. POPULATION DATA

69. Except where a Party has furnished population figures, the population data used to calculate the per capita consumption of the controlled substances for each of the Parties for the years 1994 and 1995 are taken from the estimates contained in the 1994 revisions of the publication World Population Prospects, The 1994 Revision issued by the United Nations.

XIV. CONFIDENTIALITY OF DATA

70. According to decision II/9 adopted by the Second Meeting of the Parties, production, import and export data, but not consumption data, are treated as confidential. Accordingly, although Parties are required to report and have been reporting complete data on each of the controlled substances, the data are presented in this report only by groups of substances for each Party.

Annex I

1995 DATA FOR NON ARTICLE 5 PARTIES

Key

- AI - Substances of Annex A, Group I (CFCs)
- AII - Substances of Annex A, Group II (Halons)
- BI - Substances of Annex B, Group I (Other Halogenated CFCs)
- BII - Substance of Annex B, Group II (Carbon Tetrachloride)
- BIII - Substance of Annex B, Group III (Methyl Chloroform)
- CI - Substances of Annex C, Group I (HCFCs). The base consumption is 1989 calculated consumption of HCFCs plus 2.8% of 1989 calculated consumption of substances of Annex A, Group I.
- CII - Substances of Annex C, Group II (HBFCs)
- EI - Substance of Annex E, Group I (Methyl Bromide)

Both production and consumption figures are multiplied by ozone depleting potential (ODP).

Annex I

1995 DATA FOR ARTICLE 5 PARTIES

Key

- AI - Substances of Annex A, Group I (CFCs)
- AII - Substances of Annex A, Group II (Halons)
- BI - Substances of Annex B, Group I (Other Halogenated CFCs)
- BII - Substance of Annex B, Group II (Carbon Tetrachloride)
- BIII - Substance of Annex B, Group III (Methyl Chloroform)
- CI - Substances of Annex C, Group I (HCFCs). The base consumption is 1989 calculated consumption of HCFCs plus 2.8% of 1989 calculated consumption of substances of Annex A, Group I.
- CII - Substances of Annex C, Group II (HBFCs)
- EI - Substance of Annex E, Group I (Methyl Bromide)

Both production and consumption figures are multiplied by ozone depleting potential (ODP).

Annex V

1994 DATA FOR NON ARTICLE 5 PARTIES

Key

- AI - Substances of Annex A, Group I (CFCs)
- AII - Substances of Annex A, Group II (Halons)
- BI - Substances of Annex B, Group I (Other Halogenated CFCs)
- BII - Substance of Annex B, Group II (Carbon Tetrachloride)
- BIII - Substance of Annex B, Group III (Methyl Chloroform)
- CI - Substances of Annex C, Group I (HCFCs). The base consumption is 1989 calculated consumption of HCFCs plus 2.8% of 1989 calculated consumption of substances of Annex A, Group I.
- CII - Substances of Annex C, Group II (HBFCs)
- EI - Substance of Annex E, Group I (Methyl Bromide)

Both production and consumption figures are multiplied by ozone depleting potential (ODP).

Annex V

1994 DATA FOR ARTICLE 5 PARTIES

Key

- AI - Substances of Annex A, Group I (CFCs)
- AII - Substances of Annex A, Group II (Halons)
- BI - Substances of Annex B, Group I (Other Halogenated CFCs)
- BII - Substance of Annex B, Group II (Carbon Tetrachloride)
- BIII - Substance of Annex B, Group III (Methyl Chloroform)
- CI - Substances of Annex C, Group I (HCFCs). The base consumption is 1989 calculated consumption of HCFCs plus 2.8% of 1989 calculated consumption of substances of Annex A, Group I.
- CII - Substances of Annex C, Group II (HBFCs)
- EI - Substance of Annex E, Group I (Methyl Bromide)

Both production and consumption figures are multiplied by ozone depleting potential (ODP).

Annex VI

1996 DATA FOR ARTICLE 5 PARTIES

Key

- AI - Substances of Annex A, Group I (CFCs)
- AII - Substances of Annex A, Group II (Halons)
- BI - Substances of Annex B, Group I (Other Halogenated CFCs)
- BII - Substance of Annex B, Group II (Carbon Tetrachloride)
- BIII - Substance of Annex B, Group III (Methyl Chloroform)
- CI - Substances of Annex C, Group I (HCFCs). The base consumption is 1989 calculated consumption of HCFCs plus 2.8% of 1989 calculated consumption of substances of Annex A, Group I.
- CII - Substances of Annex C, Group II (HBFCs)
- EI - Substance of Annex E, Group I (Methyl Bromide)

Both production and consumption figures are multiplied by ozone depleting potential (ODP).

Annex VI

1996 DATA FOR NON ARTICLE 5 PARTIES

Key

- AI - Substances of Annex A, Group I (CFCs)
- AII - Substances of Annex A, Group II (Halons)
- BI - Substances of Annex B, Group I (Other Halogenated CFCs)
- BII - Substance of Annex B, Group II (Carbon Tetrachloride)
- BIII - Substance of Annex B, Group III (Methyl Chloroform)
- CI - Substances of Annex C, Group I (HCFCs). The base consumption is 1989 calculated consumption of HCFCs plus 2.8% of 1989 calculated consumption of substances of Annex A, Group I.
- CII - Substances of Annex C, Group II (HBFCs)
- EI - Substance of Annex E, Group I (Methyl Bromide)

Both production and consumption figures are multiplied by ozone depleting potential (ODP).
