

Brunei Darussalam

1. Our main event will be focusing on the health aspects of the public of course, with respect to the exposure to UV radiation. For the past few months the general public have been really active in engaging with sports activities as they enjoy healthy competitions, so we plan to organize a running event, taking place in the morning. The reason being, we are trying to indirectly promote awareness through distributing the general public with free "Sunblocks" of course to educate them the importance of them being exposed to UV light, in light to Ozone Depletion. With this run, we also aim to design a shirt, with the Montreal Protocol and UNEP logo as well as the ozone theme

Prior to the event, in the coming months, we aim to get the hype heightened by airing our "Ozone" video in Brunei tv, slowly trying to catch the attention of the public towards the importance of Ozone Depleting Substances as well as our efforts to reduce the consumption of ODS

2. Art/Photo competition: Our aim was to promote artists to create a picture/art that relates to the Ozone theme in which, the winner will get a sculpture made out of the picture painted/photo created. The sculpture will then be presented on a Brunei Landmark to commemorate the 25th Year Anniversary Celebration in Brunei Darussalam.
