

Activities held in Haiti on the occasion of the 2006 International Day for the Preservation of the Ozone Layer

The activities to be carried out during the week were focused on dialogue between different sectors regarding the effective implementation of the Montreal Protocol in Haiti.

- Meetings were held between officers at the Ministry of Environment and a workshop on policies in refrigeration in Haiti. This latter activity constituted the first step towards public consultation on ODS licensing system as well as the National Ozone Steering Committee.
- The official Ozone Day celebration was held on 15 September at which government officials, bilateral agencies, universities, the press and the general public were present.
