Ozone Song
(Fighting-Fit Phytoplankton)
by David Haines

Lively \( \frac{4}{4} \) \( \frac{5}{4} \) \( \frac{12}{12} \) \( \frac{16}{16} \) \( \frac{20}{20} \) \( \frac{23}{23} \) \( \frac{27}{27} \) \( \frac{31}{31} \) \( \frac{34}{34} \) \( \frac{38}{38} \)

Humans lie in the bright sunshine but its rays aren't all of the friendly kind UV A rays age the skin UV B rays burn it but just in..... Case you thought it was all bad news Ultra-violet light makes vitamin D in him in her in me in you too It isn't just humans that have to take care of ultra-violet traveling through space then air We phytoplankton living in the sea For photosynthesis need UV But too much bleaches out the green and damages our DNA, yes, we've been..... Having a hard time for many years But now let's celebrate, whoop and cheer That Big Antarctic ozone hole is healing now thanks to the Montreal Protocol Healing thanks to the
Montreal Protocol Healing thanks to the Protocol

REFRAIN 1 [swung]

We're delightful fighting-fit, floating phytoplankton Living in the big wet sea Tiny mighty thriving thriving feisty phytoplankton Dancing nature's choreography You naughty humans sprayed Ozone depleting stuff Such as chloro-fluoro carbons Into the air enough to interfere with ozone That shields Earth from UV rays But international action has succeeded in reversing ozone's decay

REFRAIN 2

Hooray hooray hooray! We're delightful fighting-fit, floating phytoplankton Living in the big wet sea Tiny mighty thriving thriving feisty phytoplankton Dancing nature's choreography UV radiation splits molecules in stratosphere O2
(oxy-gen) divides, quickly re-com-bines, but hear! One in every half a mil-lion Ends
up as o-zone O₃, the con-qu’ring he-ro from U V shields our
pla-ne-ta-ry home His home, her home, my home, your home

BRIDGE
Ev’ry-body’s home! We’re life’s foun-da-tion food We phy-to-plank-on
down at the bot-tom of the food chain And now the o-zone hole is heal-ing

REFRAIN 3 & CODA
We’re feel-ing fit-ter so once a-gain once a-gain We’re de-
light-ful fight-ing-fit, float-ing phy-to-plank-ton Li-ving in the big wet
sea Ti-ny migh-ty throng-ing thriv-ing feis-ty phy-to-plank-ton Dan-
cing na-ture’s cho-re-o-gra-phy (it’s twinkle toes zone)

Danc-ing na-ture’s cho-re-o-gra-phy (thanks to o-zone)
Danc-ing na-ture’s cho-re-o-gra-phy!

Commissioned by Carbon Visuals for the United Nations to mark the 30th Anniversary of the Montreal Protocol
