Ad Hoc Working Group of Legal and Technical  
Experts for the Elaboration of a Global  
Framework Convention for the Protection  
of the Ozone Layer  
Third session  
Geneva, 17-21 October 1983

DRAFT ANNEX CONCERNING MEASURES TO CONTROL, LIMIT AND REDUCE THE USE  
AND EMISSIONS OF FULLY HALOGENATED CHLOROFLUOROCARBONS (CFCs)  
FOR THE PROTECTION OF THE OZONE LAYER, SUBMITTED BY  
FINLAND, NORWAY AND SWEDEN

Comments received from the Commission of the European Communities in  
response to the letter of 14 July 1983 from the Executive Director

[Original: English]  
[20 September 1983]

The Commission of the European Communities would like to recall that the European Community has taken measures for the protection of the ozone layer for some time now. As a result of the application of the two Council Decisions 80/372/EEC and 82/795/EEC the European Community has taken a number of actions in this area, among which is the reduction of the use of CFCs 11 and 12 in aerosols by 30 per cent by the end of 1981 and a cap on the production capacity of these two chemicals.

More recently the Council of the European Community endorsed a Communication of the Commission, which after reviewing the current scientific and economic situation in this area, and notably the 1983 assessment of the CCOL, concluded that:

"The current scientific and economic information indicates that no change in the policy of precautionary measures that the Community has pursued so far is needed."

Regarding the next meeting of the Ad Hoc Group in October, the Commission believes that priority in the discussions should be given to the speedy conclusion of a text for the main body of the convention and the first two annexes already proposed, which are closely connected to relevant articles of the convention.
