**A LOOK TO THE FUTURE: HARNESSING THE STRENGTH OF THE MONTREAL PROTOCOL  
FOR GLOBAL CLIMATE, HEALTH, AND ECONOMIC BENEFITS**

*43<sup>rd</sup> Open Ended Working Group of the Montreal Protocol  
Virtual Side Event*

**Wednesday 14 July, 13:00–14:00 EAT**

6:00–7:00am New York / 11:00am–12:00pm London / 3:30–4:30pm New Delhi

---

After more than three decades of action, the Montreal Protocol continues to demonstrate its capacity to identify risks to the atmosphere, generate technical and economic solutions, and quickly put them into action for results the world can trust will endure. This combination of an agile decision-making body supported by a team of global experts specializing in all relevant sectors, along with a solid financing mechanism, provides a powerful model for future climate wins.

In the context of such a well-functioning system, this event gathers a panel of experts to discuss what more the Montreal Protocol can and should do to protect the atmosphere, especially in light of the worsening climate crisis. Speakers will discuss issues where national programs offer opportunities for scaling out to other countries, the possibility of accelerating ongoing work, extension of the Protocol to serve related problems, and a look at ways to fine tune this formidable environmental body. Join our conversation for a look at the future of the Montreal Protocol.

**Moderator:** Durwood Zaelke, Institute for Governance & Sustainable Development

- **HFCs, Short-Lived Climate Pollutants, and Energy Efficiency**  
Dr. Satish Kumar, Alliance for an Energy Efficient Economy
- **Accelerating the HFC Phase Down**  
Yota Pacifico Oue, National Ozone Officer, Federated States of Micronesia

*Perspectives*

- **Climate Co-Benefits of Strategic Kigali Implementation**  
Marco Duran, United for Efficiency
- **Mobilizing Global Action on N<sub>2</sub>O up to 2030 and Beyond, Including Through the Montreal Protocol**
