^a Uso de emergencia conforme a la decisión IX/7.**G. Notificación de exportaciones a Estados que no son Partes y comercio con estos (decisión XVII/16 y artículo 4)**

22. Con respecto a 2012, último año en que se presentaron todos los datos, las Partes que notificaron exportaciones⁶ de sustancias que agotan el ozono especificaron los destinos de cerca del 98% de esas sustancias (por peso). De las 33 Partes que notificaron esas exportaciones, 29 especificaron los países de destino de algunas o todas las exportaciones. De esas 29 Partes, 26 presentaron información sobre el destino de todas sus exportaciones.

23. Con respecto a 2013, hasta la fecha solo 23 Partes han notificado exportaciones a otras Partes, y todas ellas han especificado los países de destino de algunas o todas sus exportaciones.

24. Al examinar las exportaciones notificadas correspondientes a 2012 y 2013 y la información sobre su destino, y teniendo en cuenta las restricciones al comercio impuestas en virtud del artículo 4 del Protocolo de Montreal, la Secretaría no encontró ninguna exportación destinada a Estados que no son Parte, en ninguno de los dos años.

H. Notificación del origen de las importaciones (decisión XXIV/12)

25. Con respecto a 2012, las Partes que notificaron importaciones⁷ de sustancias que agotan el ozono especificaron los países exportadores de cerca del 43% de esas sustancias (por peso). De las 164 Partes que comunicaron importaciones, 31 indicaron los países de origen de algunas o todas sus importaciones. De esas 31 Partes, 18 especificaron los países de origen de todas sus importaciones.

26. Con relación a 2013, 142 Partes han notificado hasta la fecha importaciones de sustancias que agotan el ozono procedentes de otras Partes, y 38 de ellas han especificado los países de origen de algunas o todas sus exportaciones. En próximos informes, una vez que más Partes hayan presentado los datos de 2013, se ofrecerá un resumen más exhaustivo de la información consolidada.

27. Al examinar las importaciones notificadas de 2012 y 2013 y la información sobre sus países de origen, y teniendo en cuenta las restricciones al comercio impuestas en virtud del artículo 4 del Protocolo de Montreal, la Secretaría no encontró ninguna importación procedente de Estados que no son Parte, en ninguno de los dos años.

28. Sin embargo, entre las importaciones comunicadas por Estados que no son Parte figuraba la notificación por Kazajstán de importaciones de bromoclorometano realizadas en 2012 y 2013, cuando aún no era parte de la Enmienda de Beijing. Dado que todos los productores y exportadores de esta sustancia son Partes en la Enmienda de Beijing y no deberían exportar bromoclorometano a Kazajstán, esas exportaciones representan actividades comerciales ilícitas por parte de los exportadores, ya que las exportaciones infringen las restricciones comerciales establecidas en el artículo 4⁸ del Protocolo

⁶ En su decisión XVII/16, la 17ª Reunión de las Partes solicitó a la Secretaría que revisara los formatos de presentación de informes para incluir las exportaciones y reexportaciones de todas las sustancias controladas que agotan el ozono e instó a las Partes a que aplicaran rápidamente el formato revisado de presentación de informes.

⁷ En la decisión XXIV/12, la 24ª Reunión de las Partes solicitó a la Secretaría que revisara el formato para la presentación de informes, antes del 1 de enero de 2013, a fin de incluir un anexo en el que las Partes pudieran especificar, a título voluntario, las Partes exportadoras de las sustancias que agotan el ozono notificadas como importaciones.

⁸ El párrafo 2 *sex* del Artículo 4 establece que toda Parte prohibirá la exportación de las sustancias controladas enumeradas en el grupo III del anexo C a cualquier Estado que no sea Parte del Protocolo en el plazo de un año contado a partir de la fecha de entrada en vigor de esa disposición.

de Montreal. Kazajstán no comunicó los nombres de los países exportadores ya que, según la decisión XXIV/12, no es obligatorio suministrar esa información.

I. Registro consolidado de casos de exceso de producción y consumo elaborado de conformidad con la decisión XXII/20

29. La Secretaría, de conformidad con la decisión XXII/20, ha incluido la última versión del registro consolidado de casos de exceso de producción y consumo⁹ en el anexo XII del presente informe. Los últimos casos registrados corresponden a 2013 y se basan en información recibida de los Estados Unidos de América, Francia y la Unión Europea. Las Partes también indicaron que han establecido las normas y medidas necesarias para impedir que las sustancias almacenadas se destinen a usos no autorizados, según lo prescrito en el párrafo 3 de la decisión XXII/20.

J. Información sobre los usos como agentes de procesos en 2012 (decisiones XXI/3 y X/14)

30. En la decisión XXI/3 se solicita a la Secretaría que señale a la atención del Comité de Aplicación los casos de incumplimiento en relación con la presentación de información sobre los usos como agentes de procesos para que dicho Comité los examine.

31. Solo cuatro Partes (China, los Estados Unidos de América, Israel y la Unión Europea) siguen notificando el uso de sustancias que agotan el ozono como agentes de procesos. En el cuadro B del anexo de la decisión XXIII/7 se indican sus límites más recientes de producción (o consumo) y emisiones.

32. Las cuatro Partes han presentado sus informes correspondientes a 2012. Sin embargo, solo China, los Estados Unidos de América y la Unión Europea han presentado los informes correspondientes a 2013.

K. Solicitudes de modificación de los datos de referencia

33. En el cuadro 9 se resume la información relativa a las solicitudes de modificación de los datos de referencia que se han presentado¹⁰ y examinado en el año en curso.

Cuadro 9

3. República de Moldova	– ^a	0,7	– ^a	2,67	El Comité de Aplicación la examinará en su 53ª reunión

^a Los datos correspondientes a estos años no fueron objeto de solicitud de modificación por el país en cuestión.

⁹ En la decisión XXII/20, la Reunión de las Partes pidió a la Secretaría que siguiera manteniendo un registro consolidado de los casos en que las Partes, al presentar sus datos con arreglo al artículo 7 del Protocolo, hubiesen señalado excesos en la producción o el consumo que fueran consecuencia de la producción en ese año de sustancias que agotan el ozono: a) para su destrucción en el país o para su exportación con fines de destrucción en un año posterior; b) para su uso como materia prima en el país o para su exportación con esos fines en un año posterior; c) para su exportación con el fin de satisfacer las necesidades básicas internas de países en desarrollo en un año posterior. Según el párrafo 3 de la decisión, no se considera necesario, en ninguno de los casos mencionados en el párrafo 2 de esa decisión, que el Comité de Aplicación adopte medidas de seguimiento si la Parte en cuestión ha notificado que ha establecido las medidas necesarias para prohibir el uso de las sustancias que agotan el ozono para cualesquiera otros fines que no sean los indicados en el párrafo 2 de la decisión.

¹⁰ En el párrafo 5 de la decisión XIII/15 se comunica a las Partes que soliciten modificaciones en los datos de nivel básico presentados para los años de base, que presenten sus solicitudes al Comité de Aplicación, que, a su vez, trabajará con la Secretaría del Ozono y el Comité Ejecutivo para confirmar la justificación de las modificaciones y presentarlas a la Reunión de las Partes para su aprobación.

L. Producción en 2012 de CFC, halones, tetracloruro de carbono y otras sustancias eliminadas

34. En la presente sección se ofrece información resumida sobre la producción de CFC, halones, tetracloruro de carbono y otras sustancias eliminadas¹¹ en 2012, con la cual se actualiza la información presentada a la 25ª Reunión de las Partes en 2013 (véase UNEP/OzL.Pro/25/7-UNEP/OzL.Pro/ImpCom/51/2).

35. En el cuadro 10 se resume la información recibida de las Partes que producen las sustancias cuyas fechas de eliminación ya han pasado. En el resumen que figura a continuación no se han incluido las sustancias que se han producido en pequeñas cantidades, inferiores a 0,1 toneladas métricas, por lo general para usos exentos, tales como usos analíticos y de laboratorio.

^a La producción total de la sustancia del grupo II del anexo B (tetracloruro de carbono) no representa totalmente los usos como materia prima notificados y las cantidades destruidas. La diferencia se explica por la producción secundaria no intencional almacenada para su destrucción en años posteriores.

^b Los usos como materia prima y las cantidades destruidas de la sustancia del grupo III del anexo C (BCM) exceden de la producción total. La cantidad adicional para exportación procede de las sustancias almacenadas producidas en años anteriores.

36. Como puede observarse, el grueso de la producción de esas sustancias se utiliza como materia prima.

M. Usos como materia prima de sustancias que agotan el ozono

37. En reuniones anteriores del Comité de Aplicación, algunos miembros del Comité expresaron su interés en recibir información periódica sobre las cantidades de sustancias que agotan el ozono que se usan como materia prima¹². En el anexo XIII del presente informe figura la información presentada sobre la producción e importación de sustancias que agotan el ozono para usos como materia prima, y en el anexo XIV se indica el número de Partes que notificaron esos usos.

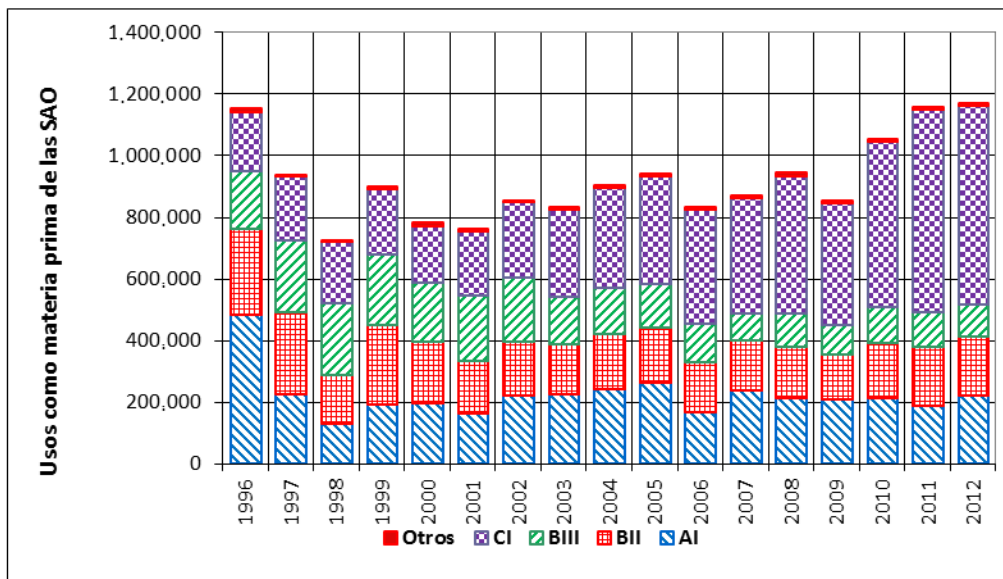

38. Además, en el gráfico de barras I se presenta información sobre los usos como materia prima y en el gráfico II se indica el número de Partes que notificaron esos usos.

¹¹ Según las medidas de control, todas las Partes debían eliminar antes de 2010 la producción y el consumo de CFC (grupo I del anexo A y grupo I del anexo B), halones (grupo II del anexo A) y tetracloruro de carbono (grupo II del anexo B), salvo para los usos exentos autorizados por la Reunión de las Partes. Además, las sustancias incluidas en los grupos II (HBFC) y III (bromoclorometano) del anexo C se eliminaron inmediatamente después de su inclusión en el Protocolo en 1996 y 2002, respectivamente.

¹² En el artículo 1 del Protocolo se indica claramente que las cantidades de sustancias que agotan el ozono enteramente utilizadas como materia prima en la fabricación de otras sustancias químicas se deben restar del cálculo de la producción y el consumo.

39. Se invita al Comité de Aplicación y a la Reunión de las Partes a que examinen la información sobre las sustancias que agotan el ozono utilizadas como materia prima.

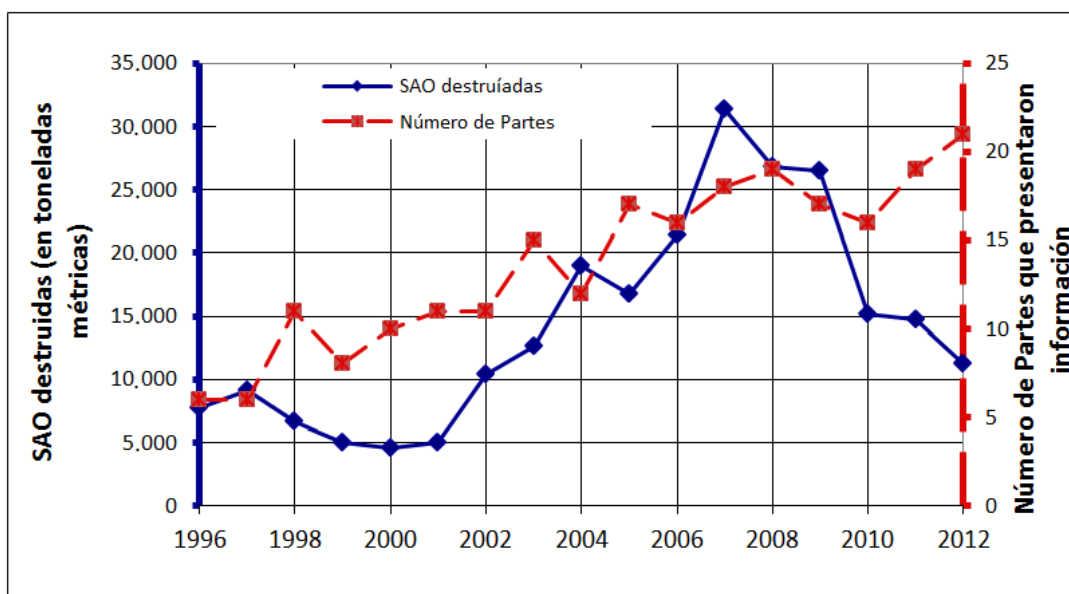

N. Destrucción de sustancias que agotan el ozono

40. Para facilitar al Comité y la Reunión de las Partes el examen de la cuestión de las sustancias que agotan el ozono destruidas¹³, en el anexo XV del presente informe figura un cuadro en el que se muestran los datos distintos de cero notificados por las Partes con arreglo al artículo 7 en relación con la destrucción de sustancias que agotan el ozono durante el período 1994-2012. En el cuadro se suman los datos anuales que presentó cada Parte sobre todas las sustancias notificadas para el año en cuestión y se presentan en toneladas métricas.

¹³ En el artículo 1 de la versión original del Protocolo de Montreal, firmada en 1987, se especificaba que había que restar del cálculo de la producción y el consumo las sustancias que agotan el ozono que hubieran sido destruidas. No obstante, el requisito de notificar las cantidades destruidas mediante tecnologías aprobadas por las Partes se introdujo oficialmente en el artículo 7 de la Enmienda de Londres, aprobada en 1990.

O. Respuesta de las Partes a la decisión XXIV/14 (notificación de la cifra de cero en los formularios de presentación de informes con arreglo al artículo 7)

41. En una reunión anterior del Comité de Aplicación, un miembro del Comité expresó su interés en recibir información sobre la respuesta de las Partes a la decisión XXIV/14¹⁴. En el cuadro 11 se muestra el número de Partes que no rellenaron por completo sus formularios de presentación de datos con arreglo al artículo 7 y el número de Partes que respondieron a las subsiguientes solicitudes de aclaración formuladas por la Secretaría.

Cuadro 11

Respuesta de las Partes a la decisión XXIV/14 relativa a la notificación de la cifra de cero en los formularios de presentación de informes con arreglo al artículo 7

Descripción de la actividad	Número de Partes	
	2012	2013 ^a
Presentación de datos anuales	197	162
Presentación de formularios de datos previstos en el artículo 7 con algunas casillas en blanco	72	53
Tasa de presentación	37%	33%
Respuesta a la solicitud de aclaración de la Secretaría	15	13
Tasa de respuesta	21%	26%

^a Los datos correspondientes a 2013 son incompletos y se actualizarán en futuros informes.

42. Cabe señalar que algunas Partes no presentan sus datos mediante los formularios previstos en el artículo 7. Algunas Partes con consumo cero o las que apenas realizan importaciones notifican sus datos a la Secretaría por carta, y algunas Partes que operan al amparo del artículo 5 presentan los datos solicitados en el artículo 7 mediante los formularios del programa para el país de la Secretaría del Fondo Multilateral.

¹⁴ En la decisión XXIV/14 se solicita a las Partes que, cuando notifiquen la producción, las importaciones, las exportaciones o la destrucción, anoten un número en cada casilla de los formularios de información que presenten y anoten cero cuando corresponda, en lugar de dejar la casilla en blanco. También se pide a la Secretaría que solicite aclaración a las Partes que presenten un formulario de información con casillas en blanco.

Anexo I

Cálculo de la producción y el consumo

1. Una de las Partes expresó recientemente su preocupación por el hecho de que la Secretaría no haya divulgado de manera adecuada la información sobre el método que emplea para calcular la producción y el consumo por las Partes de sustancias controladas en virtud del Protocolo de Montreal. En la presente sección se proporciona la información solicitada en respuesta a esa preocupación.
2. Según las definiciones de los párrafos 5 y 6 del Artículo 1 del Protocolo, las fórmulas para calcular la producción y el consumo, en su forma más básica, son las siguientes:
 - a) Producción = cantidad producida – cantidad destruida – usos como materia prima;
 - b) Consumo = producción + importaciones – exportaciones.
3. Las medidas de control se aplican a grupos de sustancias y no a sustancias por separado. Por tanto, de conformidad con el artículo 3 y el párrafo 7 del artículo 1, el consumo y la producción correspondientes a cada grupo de sustancias se calculan multiplicando cada componente de las fórmulas (es decir, la cantidad producida, las importaciones, las exportaciones, la cantidad destruida y la cantidad usada como materia prima) por el potencial de agotamiento del ozono de cada una de las sustancias del grupo y sumando luego los resultados.
4. Los datos relativos a los usos como materia prima presentados por las Partes se refieren a tres rubros diferentes: las cantidades “producidas para usos como materia prima en el país productor”, las cantidades “importadas para usos como materia prima” y las cantidades “exportadas para usos como materia prima”. En el párrafo 1 de la decisión VII/30 se aclaró que las sustancias controladas producidas y exportadas para usos como materia prima no deben incluirse en el cálculo de la “producción” o el “consumo” de los países exportadores, mientras que en el párrafo 2 de esa decisión se aclaró que las sustancias controladas usadas como materia prima no deben incluirse en el cálculo del “consumo” de los países importadores.
5. Al ajustar las fórmulas para calcular la producción y el consumo con el fin de reflejar esos aspectos de la presentación de informes sobre los usos como materia prima se obtiene lo siguiente:
 - a) Producción = cantidad producida – cantidad destruida – producción para uso como materia prima¹ – exportación para uso como materia prima²;
 - b) Consumo = Producción + (importaciones – importaciones para usos como materia prima) – (exportaciones – exportaciones para usos como materia prima²).
6. La decisión X/14 prevé que los usos como agentes de procesos reciban un tratamiento similar al de los usos como materia prima. Por tanto, los usos como agentes de procesos no deben tenerse en cuenta al calcular la producción y el consumo. En la decisión se describen las condiciones en que puede aplicarse una excepción, especificando, entre otras cosas, los usos en que se aplica la exención, las Partes que pueden hacer uso de ella, el límite máximo de emisiones y los límites aplicables a cada Parte autorizada.
7. Por tanto, el término “materia prima”, en los casos en que aparece en las fórmulas precedentes, se refiere también a los usos como agentes de procesos, pero solo para las Partes que cumplen las disposiciones de la decisión X/14.
8. En el párrafo c) del artículo 3 del Protocolo se establece que las exportaciones de sustancias controladas a Estados que no sean Parte no se restarán al calcular el nivel de consumo de la Parte exportadora.
9. Por último, en el párrafo 6 del artículo 2H se establece que las cantidades de metilbromuro usadas para aplicaciones de cuarentena y previas al envío no se incluirán en el cálculo de la producción y el consumo. Las Partes notifican su producción para esos usos (tanto dentro del país como para la exportación) y, por separado, las cantidades exportadas y las importadas para esos usos.

¹ Este componente, “producción para usos como materia prima”, se refiere a la producción para usos como materia prima en la Parte productora.

² Las “exportaciones para uso como materia prima” solo se deducen en el caso de las Partes que notifican la producción y exportación de una sustancia determinada en el mismo año.

Cabe señalar que la excepción relativa a las aplicaciones de cuarentena y previas al envío se aplica únicamente al metilbromuro y no a otras sustancias controladas.

10. Al ajustar las fórmulas para calcular la producción y el consumo con el fin de reflejar las exportaciones a Estados que no son Parte y las aplicaciones de cuarentena y previas al envío se obtiene lo siguiente:

a) $\text{Producción} = \text{cantidad producida} - \text{cantidad destruida} - \text{producción para uso como materia prima}^1, - \text{exportación para uso como materia prima}^2 - \text{producción para aplicaciones de cuarentena y previas al envío}^3;$

b) $\text{Consumo} = \text{Producción} + (\text{importaciones} - \text{importaciones para usos como materia prima} - \text{importaciones para aplicaciones de cuarentena y previas al envío}) - (\text{exportaciones} - \text{exportaciones para usos como materia prima}^2 - \text{exportaciones para aplicaciones de cuarentena y previas al envío}^4 - \text{exportaciones a Estados que no son Parte}).$

11. Acto seguido las cifras se redondean a un punto decimal conforme a lo recomendado en la 18ª Reunión de las Partes ((UNEP/OzL.Pro.18/10, párrs. 145 a 147). Ahora bien, para la presentación y el análisis de los datos sobre los HCFC notificados después del 25 de noviembre de 2011 se han usado dos puntos decimales, siguiendo la orientación de las Partes reflejada en la decisión XXIII/30.

12. A lo largo del presente informe y en sus anexos, los valores negativos de la producción calculada para un año determinado significan que las cantidades destruidas o exportadas para su uso como materia prima excedieron de la producción correspondiente a ese año, lo que hace suponer que una parte de las cantidades destruidas o exportadas procedía de existencias acumuladas. Análogamente, los valores negativos del consumo calculado indican que las cantidades destruidas o exportadas correspondientes a ese año excedieron de la producción y las importaciones, lo que hace suponer que una parte de las cantidades destruidas o exportadas procedía de existencias acumuladas.

13. Se invita al Comité de Aplicación y a la Reunión de las Partes a estudiar la información presentada en la presente sección y a facilitar a la Secretaría las orientaciones que estime pertinentes.

³ Por “producción para aplicaciones de cuarentena y previas al envío” se entiende la producción para su uso en el territorio de la Parte productora y la producción con fines de exportación.

⁴ Las “exportaciones para aplicaciones de cuarentena y previas al envío” solo se deducen si la Parte exportadora notificó la producción de metilbromuro con ese fin en el mismo año.
