REPUBLIC OF ANGOLA
MINISTRY OF ENVIRONMENT

STATEMENT BY HIS EXCELLENCY THE SECRETARY OF STATE FOR CLIMATE ACTION

38TH MEETING OF THE PARTIES TO THE MONTREAL PROTOCOL (MOP38)

HIGH-LEVEL SEGMENT

Kigali, Rwanda | 5–6 November 2026

MR. PRESIDENT OF THE 38TH MEETING OF THE PARTIES TO THE MONTREAL PROTOCOL;

MADAM EXECUTIVE SECRETARY OF THE OZONE SECRETARIAT;

EXCELLENCIES, MINISTERS AND HEADS OF DELEGATION;

DISTINGUISHED DELEGATES;

LADIES AND GENTLEMEN;

It is a great honour for Angola to participate in this important gathering, here in Kigali — a vibrant city that holds a special place in the history of global environmental cooperation.

Ten years ago, it was here that the international community took a decisive step towards protecting our planet, through the adoption of the Kigali Amendment.

A decade later, we gather once again — not only to celebrate the progress achieved, but, above all, to renew our shared commitment to the future.

.....

Allow me, first and foremost, on behalf of the Government of Angola, to express our sincere appreciation to the Government and people of Rwanda for their warm hospitality and the excellent organization of this meeting.

EXCELLENCIES,

The Montreal Protocol has shown the world that, when political will, solidarity and international cooperation come together, we can successfully address major environmental challenges.

The Kigali Amendment has further strengthened this conviction, bringing together two essential objectives: **protecting the ozone layer and combating climate change.**

Today, more than ever, we must turn commitments into action — and ambition into tangible results.

.....

LADIES AND GENTLEMEN,

Angola has been doing its part.

Since joining the Montreal Protocol in 2000, our country has continued to strengthen its regulatory framework, promote the progressive phase-out of ozone-depleting substances, and invest in technical capacity-building and good environmental practices.

Under the Kigali Amendment, we reaffirm our commitment to the gradual phase-down of hydrofluorocarbons and to promoting more efficient and environmentally sustainable technologies.

But we also recognize that this journey comes with significant challenges.

For many developing countries, the environmental transition is not simply a matter of political will. It also depends on access to finance, technology and knowledge.

.....

This is why Angola considers it essential to strengthen the Multilateral Fund, ensure effective technology transfer, and reinforce the institutional and technical capacities of developing countries.

Because a truly sustainable transition must also be a just, inclusive and equitable transition.

EXCELLENCIES,

For Angola, protecting the environment also means creating opportunities.

Opportunities to innovate, generate green jobs, modernize our economy and improve the quality of life of our people.

We firmly believe that **economic development and environmental protection should not be competing priorities, but complementary pillars of a shared sustainable future.**

.....

As we mark the tenth anniversary of the Kigali Amendment, Angola wishes to convey one clear message:

No country should be left behind.

The success of our collective efforts will depend on our ability to translate international solidarity into concrete support — and our shared commitments into real benefits for our people.

EXCELLENCIES,
LADIES AND GENTLEMEN,

Angola will remain a committed partner in the implementation of the Montreal Protocol, guided by dialogue, international cooperation and the principle of common but differentiated responsibilities.

May the spirit of Kigali, which brought us together ten years ago around a common ambition, continue to inspire our decisions and strengthen our collective determination.

……..

Because protecting our planet is not only a responsibility of our generation. It is, above all, a commitment to the generations yet to come.
