**Note by the Secretariat**

1. Pursuant to article 9, paragraph 2, of the Vienna Convention for the Protection of the Ozone Layer, the Secretariat is circulating a joint proposal to amend the Montreal Protocol on Substances that Deplete the Ozone Layer, in respect of hydrofluorocarbons (HFCs), submitted by Kiribati, the Marshall Islands, Mauritius, the Federated States of Micronesia, Palau, the Philippines, Samoa and Solomon Islands (see annex). The proposal is being circulated as received by the Secretariat, without formal editing.
2. The amendment proposal, as set out in document UNEP/OzL.Pro.27/8, along with three other proposals to amend the Protocol in respect of HFCs submitted by Canada, Mexico and the United States of America (UNEP/OzL.Pro.27/5), India (UNEP/OzL.Pro.27/6), the European Union and its member States (UNEP/OzL.Pro.27/7), was discussed by the Twenty-Seventh Meeting of the Parties, which decided, in decision XXVII/1, that consideration of the amendment proposals would continue at subsequent meetings of the parties and meetings of the Open-ended Working Group to be held in 2016.

### Island States<sup>1</sup> Proposed Amendment to Phase Down HFCs under the Montreal Protocol

#### INTRODUCTION

Production, consumption and emissions of hydrofluorocarbons (HFCs)—greenhouse gases hundreds to thousands of times more potent in their warming impact than carbon dioxide—are expected to grow rapidly over the next several decades. This amendment to the Montreal Protocol would constrain the growth of HFCs through a gradual phase down of their production and consumption. This amendment would also limit by-product emissions of HFC-23.

#### KEY ELEMENTS OF THE AMENDMENT PROPOSAL

- Establishes differentiated HFC baselines for Non-Article 5 (Non-A5) and Article 5 (A5) Parties:
  - **Non-A5 Baseline:** the average of its calculated levels of consumption in [2011, 2012, and 2013] of Annex F, Group I plus ten percent of the baseline of Annex C, Group I controlled substances.
  - **A5 Baseline:** the average of its calculated levels of consumption of Annex F, Group I controlled substances in [2015, 2016 and 2017] plus sixty-five percent of the baseline of Annex C, Group I controlled substances.

- Establishes differentiated HFC phase down schedules for Article 2 and Article 5 Parties:

Non-A5 Parties		A5 Parties	
100% HFC 2011-2013 + 10% HCFC Baseline		100% HFC 2015-2017 + 65% HCFC Baseline	
2017	85%	2020	85%
2021	65%	2025	65%
2025	45%	2030	45%
2029	25%	2035	25%
2033	10%	2040	10%

- The HFC phase down schedule for Article 5 Parties coincides with the remaining reduction steps under the accelerated HCFC phase-out—2020, 2025, 2030—to capture synergies and efficiencies through a coordinated approach under the HCFC Phase-Out Management Plan (HPMP) process.
- A5 Parties that begin implementation of the HFC phase down in advance of the schedule would still be eligible for funding of their implementation under Article 10 of the Protocol.
- The financial mechanism is further strengthened to promote energy-efficient technologies with low global warming potentials (GWPs) and to overcome barriers to the uptake of those technologies, e.g. training of technicians and equipment support in the servicing sector, demonstration and pilot projects of low-GWP and not-in-kind technologies, and revision of antiquated safety standards and legislation.

## **CONSISTENCY WITH RELATED CONVENTIONS AND MULTILATERAL AGREEMENTS**

This amendment is not only consistent with the principles and objectives of the Vienna Convention and the Montreal Protocol, but is also consistent with the principles and objectives of the United Nations Framework Convention on Climate Change, including its ultimate objective and its principle of common but differentiated responsibilities and respective capabilities:

- By reducing the amount of HFCs produced and consumed, this amendment would complement the ultimate objective of the UNFCCC, as stated in its Article 2, to achieve stabilization of greenhouse gas concentrations in the atmosphere at a level that would prevent dangerous anthropogenic interference with the climate system.
- Action taken under this amendment would be led by developed country parties, and then followed later in time by similar actions taken by developing country parties, consistent with Article 3.1 of the UNFCCC.
- Developed country parties would provide, through financial contributions to the Multilateral Fund, the means of implementation for the “agreed full incremental costs” of actions to be undertaken by developing country parties, consistent with Article 4.3 of the UNFCCC.
- By reducing the amount of HFCs produced and consumed, this amendment would further complement the Kyoto Protocol and any future emissions control regime. However, this amendment, as per its Section III, would have no effect on the status of HFCs under the Kyoto Protocol, nor would it affect the opportunities of Parties to the Kyoto Protocol to meet their commitments under that treaty by reducing HFC emissions.
