INDUSTRIAL DEVELOPMENT ORGANIZATION

## **SPODS: A Sustainable and climate-friendly Phase out of Ozone Depleting Substances**

### **Objective:**

To support the EU's role, political objectives and overall ambitions on climate change policies, particularly with regard to the implementation of the Kigali amendment to the Montreal Protocol, and thus taking quick and effective mitigation action on HFCs.

### **Key activities:**

- Trainings and Capacity Development for different stakeholders (e.g. public and private sector)
- Policy advice and strategy development for different sub-sectors (e.g. cold chains, ODS bank management)
- Technology and industry roadshows (e.g. promote ozone, climate-friendly and energy efficient technologies and engage respective decision-makers regarding availability, affordability and need for alternative technologies)
- Specifically tailored support following the demands from selected countries

Co-funded by the European Union
