Second update on COVID measures in Thailand

1. Recent changes made by the Royal Thai Government in respect of COVID-19 measures presented here below. Where no update has been made, the measures outlined in the note of 19 May 2022 apply.

   a) All participants are required to register for the Thailand Pass which has been simplified and takes no more than 2 hours to be finalised and issued.

   b) When applying for the Pass, participants should provide details of their vaccination dose and upload: (i) certificate of vaccination; (ii) copy of passport; and (iii) proof of medical insurance coverage upto USD10,000. The validity of documents uploaded will also be checked by the Quarantine Health Officer at the airport.

   c) Approved Thailand Pass QR Code can be used to enter Thailand on a different date of arrival if the new date of arrival is within 72 hours (3 days) after the original date of arrival indicated on the QR Code. Each Thailand Pass QR Code can be used only once.

2. All delegates who intend to participate in the meetings in person should be fully vaccinated against COVID-19 (section V on Health requirements and medical facilities, paragraph 11 of the information note of 19 May 2022). Accordingly:

   a) Funded Participants are requested to send their vaccination certificates to the Secretariat before the issuance of air tickets for travel.

   b) Non-funded participants are requested to present their vaccination certificate at the registration desk in Bangkok during collection of meeting badge.

3. Information Note shared on 19 May 2022 will be updated to reflect the above noted changes to the COVID measures in Thailand.
