

# Workshop on energy efficiency opportunities while phasing-down hydrofluorocarbons

## Session 4 Questions from the Mobile App

1. How can International Funds for Energy efficiency best be combined with Projects funded through the Multilateral Fund for implementation of the Montreal Protocol
2. From a practical view: how can national ozone units (NOUs) make best use of the existing funding opportunities?
3. How important is national level policies such as MEPS and labelling in helping finance flow?
4. To improve trust and visibility should all cooling equipment have a visible performance indicator for energy efficiency?
5. Low hanging fruit could mean low returns. It needs improvement in operational efficiency to handle a scale up. How can new technologies such as big data, AI, or Blockchain contribute to turning many small projects into bankable projects?
6. Where is the best place to learn about very successful energy efficient projects funded with development investment resources?
