## Opportunities to Maximize the Benefits of the Montreal Protocol: Assuring Successful Implementation of the Kigali Amendment & Beyond

*44<sup>th</sup> Open Ended Working Group of the Montreal Protocol*  
*Side Event*

13th July 2022, room CR-4  
13:00 - 15:00, Bangkok (UTC+07:00)

Opportunities abound to maximize the benefits of the Montreal Protocol: Many parties have already started on the HFC phasedown, and technology developments are providing new opportunities to strengthen compliance, leapfrog high-global warming potential (GWP) HFCs, and assure successful implementation. At this panel, attendees will hear about proven technology strategies to help assure compliance, the importance of lifecycle refrigerant management and managing banks, and emerging opportunities to safeguard consumers and improve energy efficiency alongside the HFC phasedown.

---

### Moderator

- Dr. Gabrielle Dreyfus, Chief Scientist, IGSD

### Panelists

- Kofi Agyarko, Director, Renewable Energy, Energy Efficiency, and Climate Change (REECC), Ghana Energy Commission on *opportunities to safeguard consumers and improve energy efficiency alongside the HFC phasedown*
- Christina Starr, Senior Policy Analyst, Environmental Investigation Agency (EIA), on *the importance of lifecycle refrigerant management and managing HFC and ODS banks*
- Dr. Guus Velders, Senior Scientist, National Institute for Public Health and the Environment (RIVM), on *the science of projecting HFC emissions and sectors with large emission reduction potential*
- Kristen Taddonio, Liaison to Society of Automotive Engineers (SAE International) and Senior Climate & Energy Advisor, IGSD, on *mitigating HFC emissions in the mobile sector: progress and opportunity*
